On the cover: Single 7" Rough-Sawn Shingle in Pueblo

HARBOR MILL™

POLYPROPYLENE SHAKE AND SHINGLE COLLECTION

The authentic look of ProVia® Harbor Mill shake and shingle siding is reminiscent of traditional sawn and split cedar shakes & shingles that have been featured in American homebuilding since the 1600's. There are few other cladding options as distinctive as cedar shake and shingles, and we set out to create a product which reflects that distinct appearance. To preserve this authentic look, both profiles were modeled after hand-picked cedar pieces using highly accurate laser scanning to ensure even the finest details were carried over into each Harbor Mill Shake and Shingle. The clean grain lines of Harbor Mill with its varying peaks and valleys create the authentic look of traditional cedar but with the versatility and ease of ownership that ProVia siding products are known for.

REALISTIC AND EASY TO INSTALL

Both profiles were modeled after hand-picked cedar pieces. To preserve this authentic look, select boards were laser scanned to ensure even the finest details were carried over into each Harbor Mill™ Shake and Shingle. We wanted to create a product that not only looks ultra-realistic but is also easy to install. Harbor Mill was built for the homeowner with the installer in mind.

- Rigid lightweight material
- No painting, staining, or caulking required
- Inherently moisture resistant - will not rot
- Low-maintenance - just rinse with a garden hose
- Available in all ProVia® siding colors
- Lifetime Limited Warranty

Corners Have Two Unique Grain Patterns to Match Shake & Shingle Panels

Reverse Side Features

- Elevated Alignment Tab
- Full Length Drop Guard
- Seam Lock

SINGLE 7" ROUGH-SAWN SHINGLE

Sawn Shingles are tapered due to the sawing process. The saw also helps make the shingles smoother which will show a more muted cross-graining. By design, shingles are more uniform and present a cleaner look.

A more uniform graining translates into a cleaner, more sophisticated appearance.

Straight edges provide a traditional look.

The graining is prevalent not just on the face, but also on the bottom of each rough-sawn shingle.

SINGLE 8" STAGGERED HAND-SPLIT SHAKE

Hand-split Shakes typically show a more detailed woodgrain texture. The splitting process produces a wider range of ridges, grooves, and graining differences helping provide a more rustic and rugged look.

A staggered, hand-split style gives our shake a rugged and bold look with deep grooves and enhanced grain patterns.

Ultra-realistic graining and natural edges provide authenticity.

The coarse graining follows through to the ends of the hand-split shake panels for ultimate realism.
